EXPERIENCE

QIS Engineer - Quantitative analyst

Oct. 2025 – Present

BNP Paribas Asset Management

Paris, France

- Quantitative Analyst within the Pricing Solutions team at BNP Paribas Asset Management, responsible for the independent counter-valuation of Quantitative Investment Strategies (QIS) developed by BNP Paribas CIB.
- Implementation of quantitative processes for equity index selection, integrating filters (liquidity, capitalization, ESG, etc.), scoring criteria and weighted allocation models (optimization under linear or quadratic constraints).

Quantitative Market Risk Analyst Intern

Apr. 2025 – Oct. 2025

BNP Paribas Cardif

Paris, France

- Studied and compared interest rate models (e.g. Hull-White, G2++, HJM) to understand their mathematical structure, assumptions, and practical advantages/limitations.
- Performed the calibration of interest rate models (Hull-White, G2++) using market data extracted from Bloomberg (zero-coupon curves, cap/floor and swaption volatilities).
- Implemented a pricing tool for structured products on interest rates using Python, using the Hull-White and G2++ models.

Assistant Portfolio Manager Internship

Summer 2024

Prometheus Wealth Management

Monaco

- Pricing of structured products (reverse convertible, outperformer) using Leonteq and Morgan Stanley pricers. I also provided investment proposals, assisted portfolio managers with various Excel/VBA tasks, and became familiar with Bloomberg for market analysis and data extraction.

Investment Advisor Internship

Summer 2023

Edmond de Rothschild

Monaco

- Internship in the advisory department that introduced me to the financial world, with a focus on derivative and structured products, particularly Dual Currency Deposits.

EDUCATION

University of Paris-Saclay

Sep. 2024 – Apr. 2025

M2QF – Master's degree in Quantitative Finance (ex-M2IF / DEA Monique Jeanblanc)

Evry, France

- Main courses : Stochastic Calculus and Control, Machine Learning, Econometrics, Interest Rate Modeling, Asset Management, Derivative Products, Programming, Risk Management.

ENSIIE

Sep. 2022 – Apr. 2025

MEng in Applied Mathematics

Evry, France

- Main courses : Probabilities, Data Analysis, Optimization, Statistics, Stochastic Processes and Programming.

University of Bologna

Feb. 2024 – July. 2024

Erasmus and Double Degree

Bologna, Italy

- Main courses : Financial and Actuarial Mathematics, Corporate Finance, Risk Management.

PROJECTS

Asset Management and Sustainable Finance Optimization

2025

University of Paris-Saclay

Evry, France

- Implemented multiple portfolio optimization strategies: long/short, long-only, risk budgeting, and ESG-constrained using mean-variance optimization and quadratic programming.
- Developed an analytical and numerical study of the tangency portfolio with and without risk-free asset inclusion.
- Designed climate-aware portfolios by incorporating carbon intensity, green intensity, and ESG score constraints, including sector-neutral decarbonization pathways.

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

President of the sports association

2023 – 2024

ENSIIE

Evry, France

- Team organization and registration for university tournaments.
- Discussions with the town council about the availability of sports facilities.

SKILLS AND HOBBIES

Finance: Implemented trading strategies and performed backtests using WorldQuant's BRAIN platform.

IT: Python, R, Excel/VBA, C++.

Languages: French/Native – English/Fluent – Italian/intermediate

Sports: Football, Running, Volley Ball, Beach Volley Ball (French Cup finals), ski.
